themselves strong in both body and mind.

- I disagree. Most children only use the Internet as a study tool. They can collect lots of useful information quickly and easily on the Internet.

(別解例)

- I agree that children are spending too much time online these days. They tend to spend many hours surfing the Internet, playing online games, or watching videos. That not only damages their eyes but also means they have less time to spend with their friends and family. Children need to focus on their studies and spend more time with their friends and family.
- I don't think children are spending too much time online. The Internet is just one of the many tools they use to get information to help them with their studies. Thanks to the Internet, they can access various kinds of useful information easily and without having to pay for it. They also use other media like TV and books for this purpose, so you can't say they only rely on the Internet.
